

Technical drawing of a roof structure showing cross-sections and dimensions. The drawing includes a series of cross-sections labeled "PRÍČNA SPÁRA REZANA" and "KLIZNÉ TRNÝ". Dimensions are provided for various parts, including a total length of 47.5 and individual section widths of 0.50. A vertical dimension of 3.05 is also shown.

Technical drawings of a road cross-section showing three types of drainage systems:

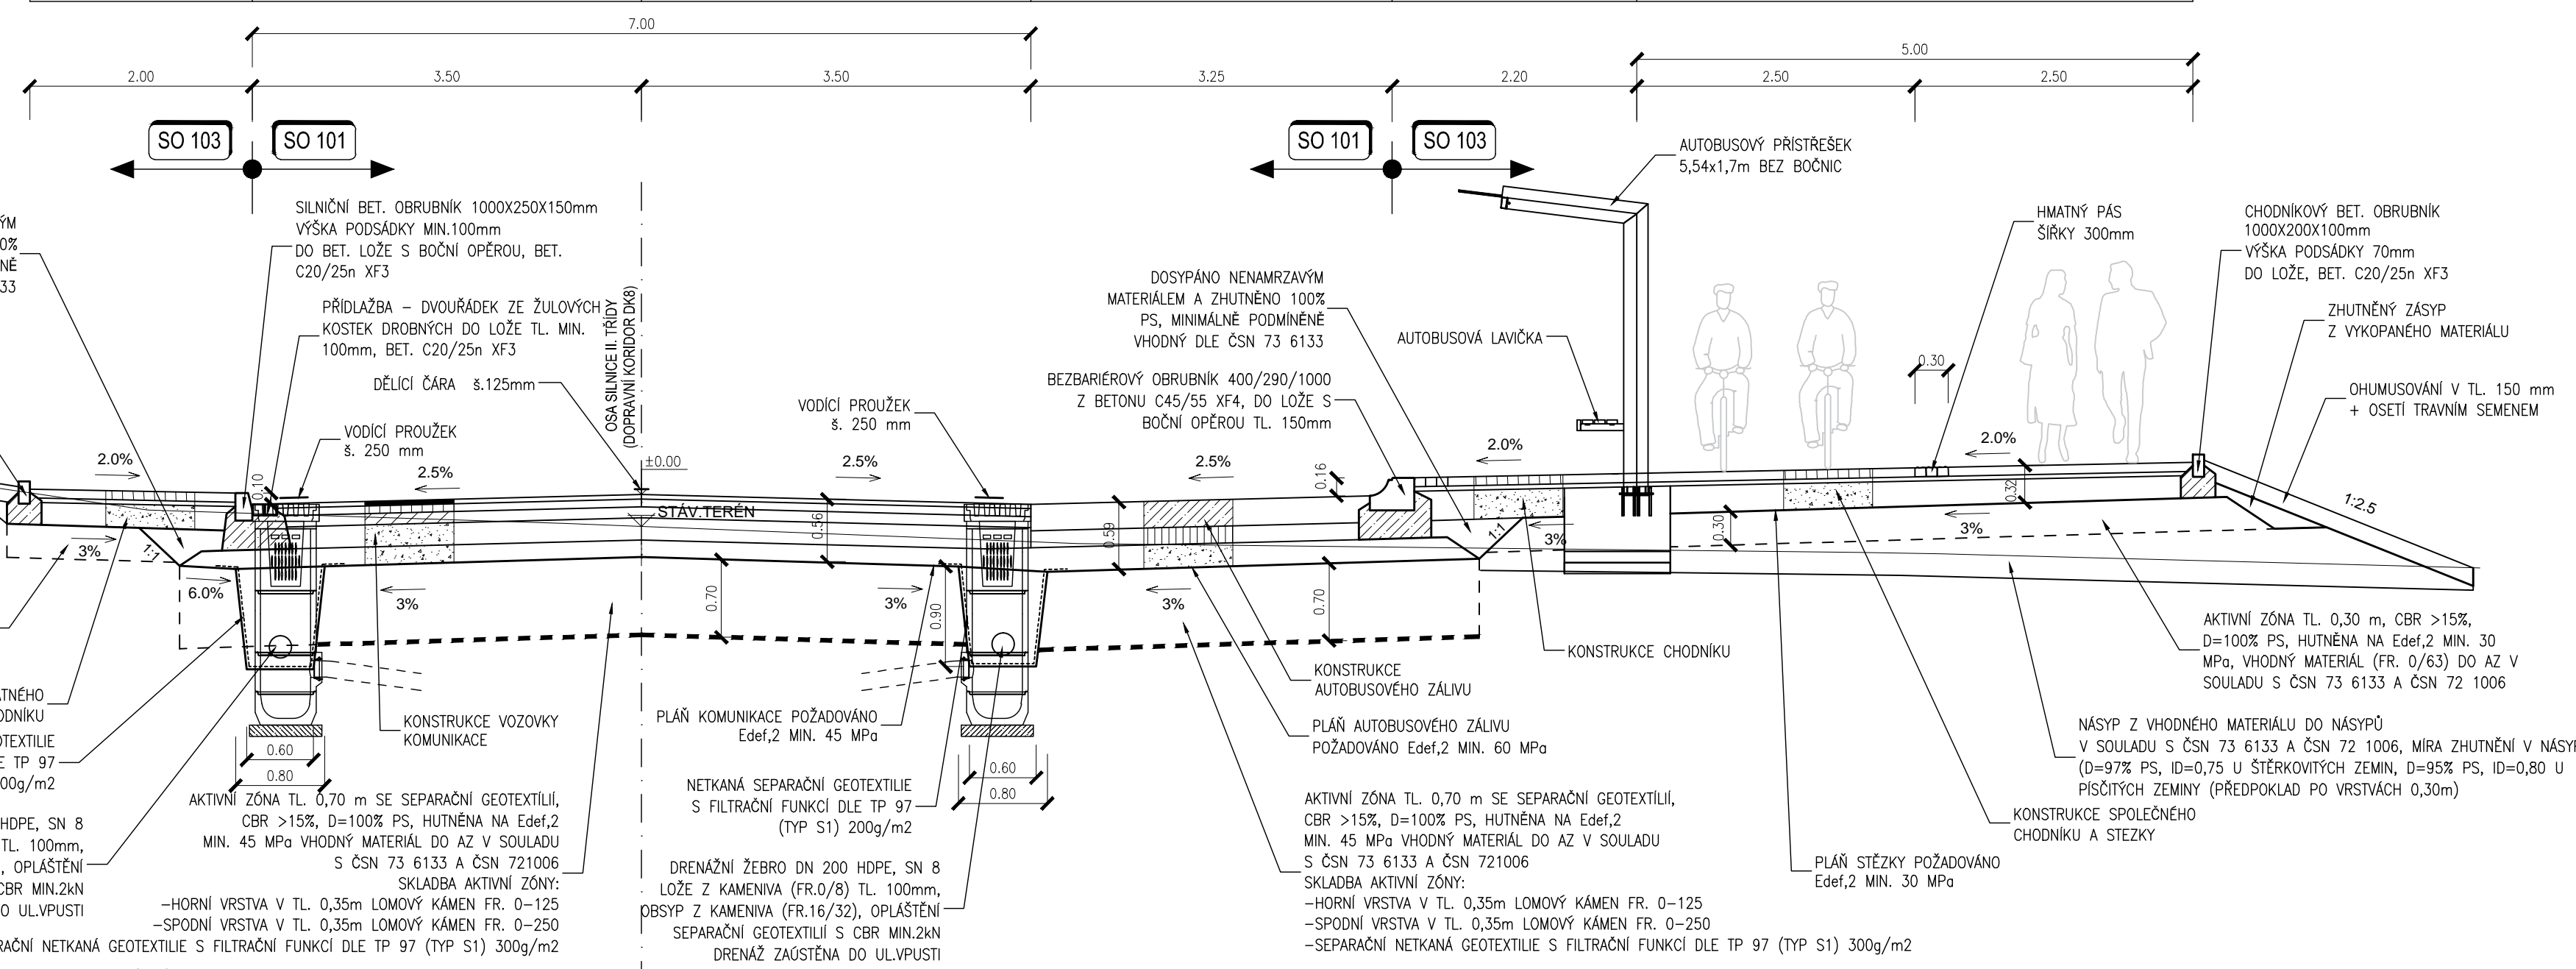

- Standard drainage:** Shows a 100mm wide channel, 100mm high, and 100mm wide. The channel is covered with a 60mm thick grate. The channel is made of superplasticized cement concrete (SBT) with a thickness of 240mm. The channel is covered with a 60mm thick grate. The channel is made of superplasticized cement concrete (SBT) with a thickness of 240mm.
- Drainage with a 100mm wide channel:** Shows a 100mm wide channel, 100mm high, and 100mm wide. The channel is covered with a 60mm thick grate. The channel is made of superplasticized cement concrete (SBT) with a thickness of 240mm. The channel is covered with a 60mm thick grate. The channel is made of superplasticized cement concrete (SBT) with a thickness of 240mm.
- Drainage with a 100mm wide channel:** Shows a 100mm wide channel, 100mm high, and 100mm wide. The channel is covered with a 60mm thick grate. The channel is made of superplasticized cement concrete (SBT) with a thickness of 240mm. The channel is covered with a 60mm thick grate. The channel is made of superplasticized cement concrete (SBT) with a thickness of 240mm.
